AKAL ERUPE

Entry level Software Developer

akalerupe@gmail.com

+254 741 999 245

Nairobi,Kenya

https://github.com/akalerupe

As every job is a self-portrait of the person who does it, Akal likes to autograph hers with excellence. Akal is an innovative mind seeking to use proven skills in leadership, coding, and debugging to solve real-time societal problems. She has skills in HTML /CSS, JavaScript, Python, Django, React, Kotlin, and Rest APIs.She has worked on various projects including a school management system in Django and a Movie review website in HTML/CSS and JavaScript. Akal is seeking an entry-level software Developer internship to put her skills into practice as well as expand her scope on the same.

SKILLS

HTML5	CSS3	JavaScript
Python	Django	React
Git	Rest API	negotiation

PROJECTS

Android Development
- **Contact Book clone App**
 Used RecyclerView with intent to create a clone contact Book app.
https://github.com/akalerupe/KotlinContactBook
- **School Registration App**
Built a registration app using Kotlin that mimics a typical student registration process
https://github.com/akalerupe/signupForm

Frontend web Development
- **Movie Review website**
 Incorporated glassmorphism into my movie review to make the landing page catchy.
https://eloquent-panini6eca8.netlify.app/index.html
- **Mkulima App**
Used vanilla JavaScript to build an app that mimics the processes farmers and vendors go through to register in an E-commerce site
https://github.com/akalerupe/CatPrepJS/blob/main/Cat.js

Backend Development
- **School Management System**
 Used Django to build a management system to aid in asset tracking.
https://github.com/akalerupe/AkiraChix-schoolsystem
